EDUCATION

ARIZONA STATE UNIVERSITY

BS in Software Engineering, Cumulative GPA: 3.7

May 2026

Relevant Coursework: Software Analysis & Design, Web-Based Applications, Applied Linear Algebra, Data Structures & Algorithms, Operating Systems & System Programming, Mobile System Design, Embedded C Programming, Distributed Software Systems

TECHNICAL SKILLS

Programming Languages: C, C++, SQL, JavaScript, TypeScript, Java, Python

Frameworks: Vue, Expo, React, React Native, Java FX, Java Swing

Technologies: Java Springboot, Postman, EC2 AWS, Oracle VirtualBox, OpenAI, Docker, Github

Workflows: Agile SCRUM

EXPERIENCE

BostonApartments.com

iOS/Android Mobile Application Developer

Sept. 2025 - May 2026

- Built a cross-platform iOS and Android mobile application enabling tenants to search and browse properties in Massachusetts, replicating the full functionality of the existing website.
- Integrated custom API endpoints with the client's legacy PHP database to support dynamic property data retrieval.
- Automated location coordinate updates for property listings by deploying a Python cron job on the server.
- Provided increased customer-value through a customizable white-labeling system using Node.js
- Developed the application using the Expo framework with React and React Native.

PROJECTS

Bus Scheduling Desktop Application

Oct. 2024 - Dec. 2024

- Extended and repurposed the open-source Memoranda application into a bus and route scheduler for a mock school system using Java and the Java Swing framework.

Paws N Play

Sept. 2025 - Oct. 2025

- Developed a CLI pet service application in Java and SQL, using JDBC to connect to a live MySQL database server.

ASU Sundevil Connect

Feb. 2026 - Apr. 2026

- Built a club and event management application for ASU students, club leaders, and college administrators using Java and JavaFX with an SQLite database.

IIOT Device: HTTP Parsing and Embedded Operations

Mar. 2026 - May 2026

- Engineered a temperature sensor reporting device using an ATmega328p microcontroller and C to relay sensor data to a network controller over HTTP. Debugged using a virtual controller.

Test Suite AI Agent

Jul. 2026 - Ongoing

- Developed an agentic assistant that can read a project's file structure and takes a web application's url to automatically create a Playwright test suite. The agent then validates those tests to check its work before human intervention is needed. Utilizes an OpenAI model, LangChain, Pydantic, and Python.
