Frameworks: Vue, Expo, React, React Native, Java FX & Swing

Technologies: Java Springboot, Postman, EC2 AWS, Oracle VirtualBox

PROJECTS

Bus Scheduling Desktop Application

Oct. 2024 - Dec. 2024

Uses Java and the Java Swing framework to repurpose Memoranda into a bus and route scheduler for a mock school system.

Paws N Play

Sept. 2025 - Oct. 2025

A CLI pet service application using Java and SQL with JDBC to connect to a live MySQL database server.

ASU Sundevil Connect

Feb. 2026 - Apr. 2026

A club/event manager for ASU students, club leaders, and college admins. Uses Java and JavaFX with an SQLite implementation.

Community Emergency Response Team (CERT) Application

Jun. 2026 - May 2026

A CLI application that performs survey intake and keeps a proper record for the response team. Can export/import reports. Uses python and SQLite

IIOT Device: HTTP Parsing and Embedded Operations

Mar. 2026 - May 2026

A temperature sensor reporting device that relays information to its controller over the network. Atmega328p and C

EXPERIENCE

BostonApartments.com

iOS/Android Mobile Application Developer

Sept. 2025 - May 2026

Created a mobile application to help tenants find properties in MA. Encompasses the functionality of the original website. Used custom API endpoints with the sponsor's legacy php database. Ran a python cron job on the server, dynamically updating location coordinates for each listing. Uses Expo framework (react/react native)
